

CABC Non-TAPI Phone Dialler

Cost-effective Maximizer integration with your phone system!

CABC's Non-TAPI phone dialler provides the facility to...

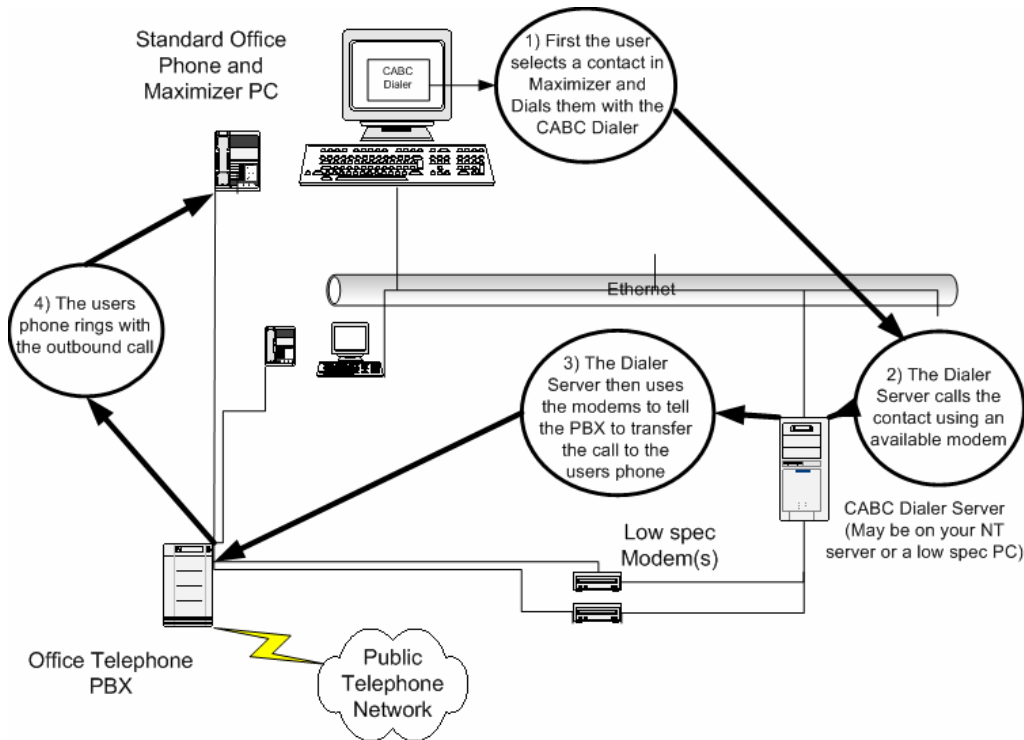

Dial directly from your screen without the expense of converting to a TAPI phone system...

Create phone notes in Maximizer at the time of the call instead of having to enter a manual note...

The chosen contact's number is dialled by the modem. The call is then transferred back to the user which in turn frees the modem for the next call.

How does it work?

Who is the Non-TAPI dialler intended for?

CABC's Non-TAPI phone dialler allows telephone and software integration without the expense of a TAPI (Telephony Application Programming Interface) phone system, allowing you to dial directly from your screen.

For more information about the Non-TAPI phone dialler or our other Maximizer add-ons, please contact CABC on: +44 (0)1635 570970
